Stewardship

Stewardship Lifestyle

Stewardship
a way of life

"Because there is one bread, we, who are many, are one body, for we all partake of the one bread." 1 CORINTHIANS 10:17

As disciples of Jesus, we are called to lead holy lives and invite others to join us. We are called to be fed and to feed others. Living a stewardship lifestyle, being grateful and generous with our gifts, serves a twofold purpose. One, it helps build God's kingdom here on earth. Two, it helps us strengthen each other's relationship with God the Father, Jesus, and the Holy Spirit. It becomes our roadmap to Heaven. Let's help each other get there!

Scam & Phishing Alert

Parishioners around the diocese continue to receive emails and phone texts purporting to be clergy and seeking financial assistance. Unfortunately nothing can be done

to stop them.

Please know that none of our parish priests or staff members will ever contact you via email (or phone) to ask that you provide them with gift cards or assist them financially in a crisis situation. If you receive an email which is seemingly being sent by a priest or staff member requesting financial assistance of any kind, please report it to the parish office immediately at 856-667-2440 or parishoffice@christourlight.net. Please also inform other parishioners in your family and neighborhood who may not see this information in the bulletin.

Care for Creation

Creation Care Corner

"The pace of consumption, waste and environmental change... can only precipitate catastrophes...". "Truly much can be done!" – Pope Francis

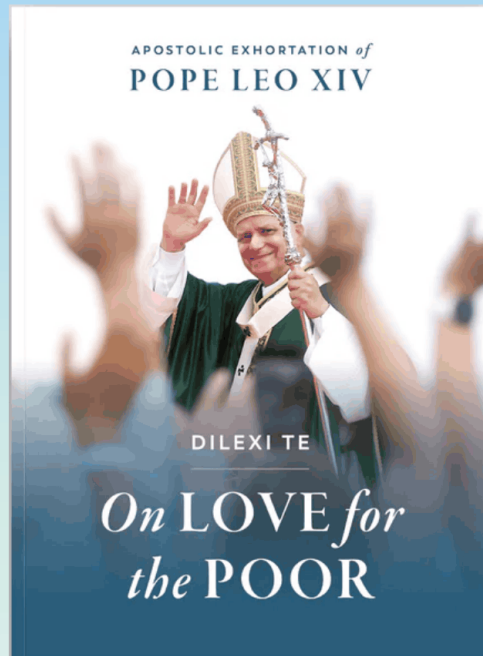

Electric Vehicles: A Creation Care Benefit ?

Transportation emissions in the United States are a large source of both air pollution and climate-warming greenhouse gas emissions (GHGs). The Iran war's oil price shock, which has pushed the US national average above \$4 per gallon has reignited consumer interest in EVs. But are there creation care and economic benefits to making the switch?

When comparing EVs to gas powered vehicles, EVs typically are a creation care benefit. According to the US Dept. of Energy, electric vehicles today produce 46% fewer GHGs than comparable gasoline powered vehicles on a life cycle basis. Whether it is an economic benefit depends on numerous factors, including whether you have a garage to charge the vehicle, the current price of gas, the number of miles you drive, and state electricity rates. The equivalent "cost per gallon" for average EV charging costs is less than \$1.65 per gallon for most states. A vibrant EV used car market could accelerate the payback calculation. Don't forget other emission reducing alternatives like reducing # of vehicles/family, driving less, and using public transportation. For more information: <https://tinyurl.com/CCCEVinfo>
